

B-10 waiting-shape grid, report 978195.nqsv

Preregistered contrast constant vs symmetric-modulo (3 families x 18 pairs, 36 cell effects)

● Cell effect + 95% interval
■ Overlaps boundary
○ Constant reference
| Block-level paired effects
■ +/-3.0% margin

Pegasus compute nodes; 48 threads; silo; YCSB write-heavy / balanced / read-heavy; 5 reps x 3 blocks; CCBench 511c953; official_certification: false

Intervals inside the band are not equivalence; no per-cell significance is decided.
